-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION
Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims #1 - 26, are drawn to a method for method for monitoring and controlling interconnect manufacturing process, classified in class 438, subclass 687.
- II. Claims 27-30, drawn to apparatus for monitoring and controlling a multi-step semiconductor wafer processing system, classified in class 711, subclass 101.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and II are related as a method for monitoring and apparatus for controlling the process, for their practices. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the apparatus claimed in Group II can be carried out by entirely different process than that claimed in Group I. For example, the apparatus can be used to deposit and monitor materials other than copper; thus, gold, arsenic, gallium, silver, aluminum are other materials that can be deposited. The apparatus can also be used to deposit a material in areas, on the device, other than a barrier layer, seed layers or trench; thus, the apparatus can be used to deposit material on a wafer, as a top sealing layer or mask layer.

Art Unit: 2812

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for each group is not required for the other groups, the restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andre' C. Stevenson whose telephone number is 571 272 1683. The examiner can normally be reached on Monday-Friday 9:30-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael S. Lebentritt can be reached on 571-272-1873. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
